

• Depending on the software installed or your service provider or country, some of the descriptions in this guide may not match your phone exactly.
 • Depending on your country, your phone and accessories may appear different from the illustrations in this guide.

Installing the SIM card and battery

1. Remove the battery cover and insert the SIM card.

Note: Without the SIM card, you can listen to the FM radio and access the **Settings** menu.

2. Install the battery and reattach the cover.

Charging the battery

1. Plug the supplied travel adapter.

Note: When you plug in the travel adapter, the charging indicator may not appear for up to 5 minutes, but the battery is charging properly.

2. When charging is finished, unplug the adapter.

Note: Do not remove the battery from the phone without unplugging the adapter first. Otherwise, the phone may be damaged.

SAR information

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the European Union (EU) Council. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on the safety standards that were developed by independent scientific organisations through periodic and thorough evaluation of scientific studies.

The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless phones employs a unit of measurement known as Specific Absorption Rate (SAR). The SAR limit set by the EU Council is 2.0 W/kg. The highest SAR value for this model phone was 0.637W/kg.
